4:00 PM - 5:00 PM

Campaign to Save the Environment is a national effort to build support for environmental organizations across the country. We run campaigns for progressive groups like Sierra Club and Environment America.

We currently have paid positions open on our environmental staff in each of the 60 offices across the country. We require that interested candidates are hard workers and have excellent communication skills.

Students will have the opportunity to educate and activate citizens on pressing environmental issues, organize press conferences, and build coalitions with other non-profit environmental and public health organizations. Through holding such responsibilities, students gain knowledge of pressing environmental concerns, learn how to effectively generate public support, and obtain a firm understanding of the political process.

Four information sessions will be held each day that we are on campus with individual interviews immediately following.

We will also have a table in the Student Center from 10am-2pm both days that we are on campus.
